

Key Business Benefits

Email eDiscovery

Users and administrators can perform real-time search of their messaging archive. Integrated eDiscovery tools allow eDiscovery requests to be executed instantly,

Email Recovery

Users can recover their own email and attachments by either a one-click or package recovery method. The IT department is provided with a single solution for disaster and enterprise-wide recovery.

Email Continuity

The webmail interface ensures continuous email access for staff to send email at anytime, even during network outages.

Knowledge Management

With an estimated 80% of corporate IP contained within email*, staff will benefit greatly by having instant access to view and recover any record of their email history.

*Osterman Research Survey 2007

Active Email Archiving

Active email archiving automates the indexing and storage process, ensuring corporate email is protected and your business satisfies commercial, compliance and legislative requirements.

Storage Management

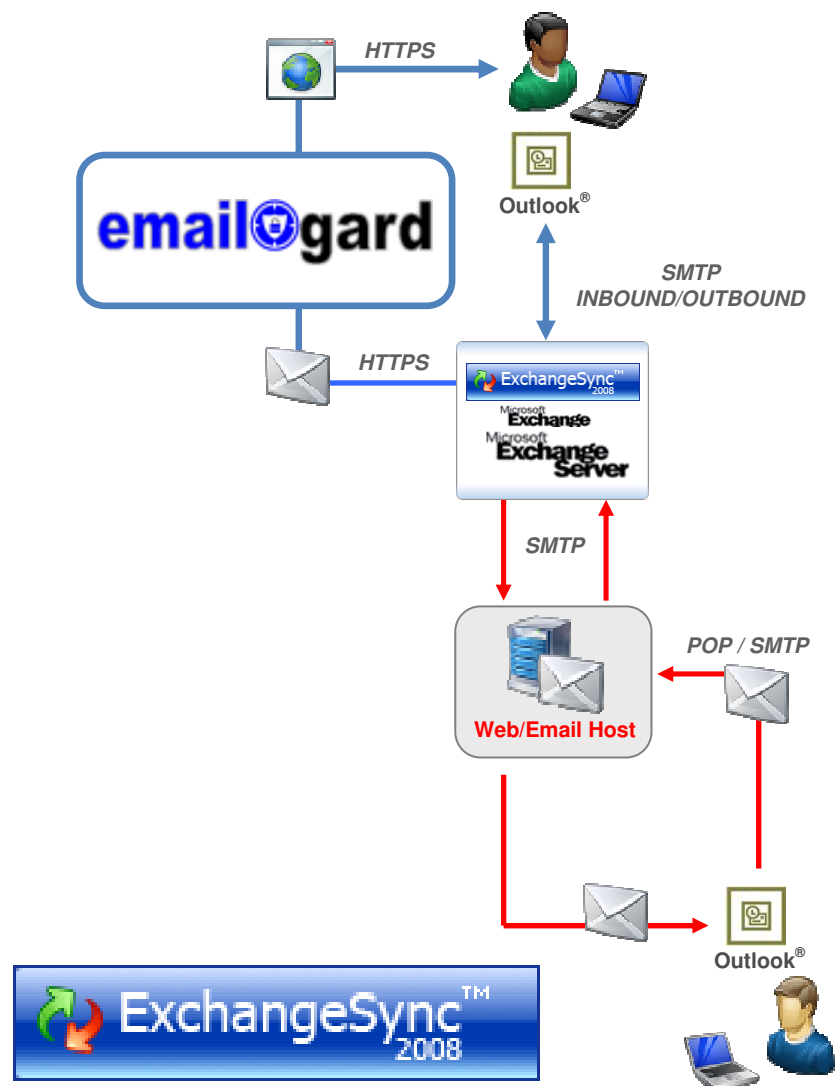

The integration of highly scalable storage technology provides the simplest and most cost effective solution for managing the problem of increasing email volumes.

ExchangeSync™

Designed as a network deployed adaptor ExchangeSync™ provides the fully automated backup and continuous archival of all email records and contacts via an SSL encrypted connection to eMailgard.

eMailgard Enterprise Edition (Non-Routed)

eMailgard Enterprise Edition is a premium solution designed for businesses operating with Microsoft Exchange Server or Small Business Server. By installing the ExchangeSync™ adaptor businesses benefit from fully automated email archiving without the need to route email through a gateway. Integrated eDiscovery and recovery tools ensure that your business can meet all of the individual, corporate and legal demands for managing email.
