

Key Business Benefits

Email eDiscovery

Users and administrators can perform real-time search of their messaging archive. Integrated eDiscovery tools allow eDiscovery requests to be executed instantly,

Email Recovery

Users can recover their own email and attachments by either a one-click or package recovery method. The IT department is provided with a single solution for disaster and enterprise-wide recovery.

Email Continuity

The webmail interface ensures continuous email access for staff to send and receive email at anytime, even during network outages.

Knowledge Management

With an estimated 80% of corporate IP contained within email*, staff will benefit greatly by having instant access to view and recover any record of their email history.

**Osterman Research Survey 2007*

Active Email Archiving

Active email archiving automates the indexing and storage process, ensuring corporate email is protected and your business satisfies commercial, compliance and legislative requirements.

Storage Management

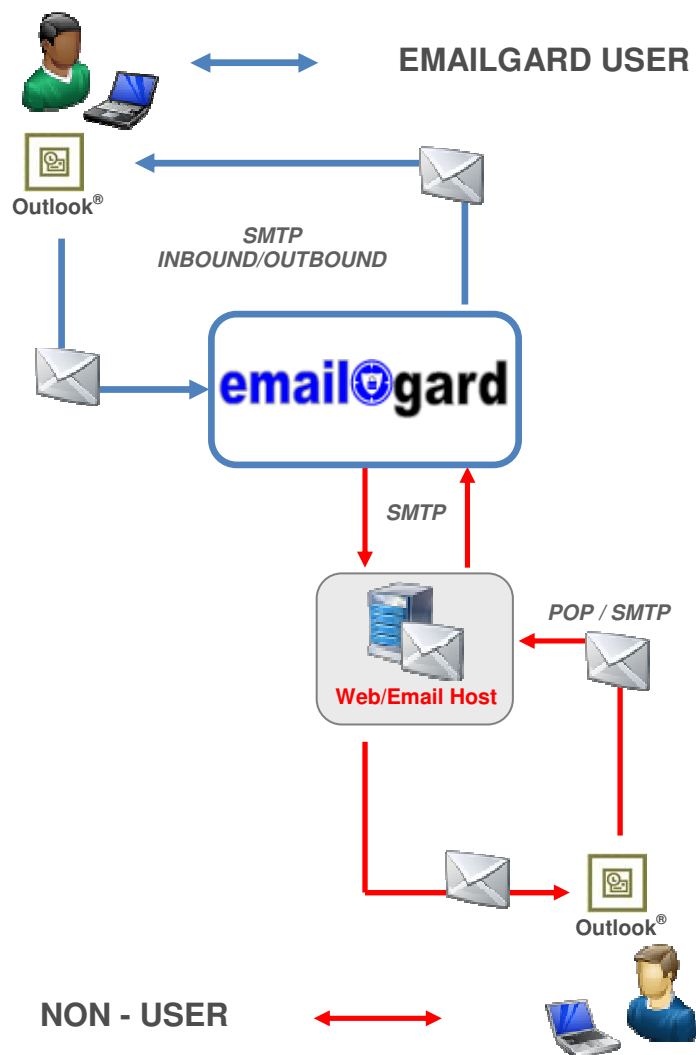

The integration of highly scalable storage technology provides the simplest and most cost effective solution for managing the problem of increasing email volumes.

Email Protection

Email filtering at the gateway ensures the security of your business' IT network, while integrated encryption on-disk and via SSL delivery delivers complete email protection within the one simple business solution.

eMailgard Gateway Plus Edition

Gateway Plus Edition is ideal for business customers who are looking for more email management capabilities than their existing email hosting company can provide. With eMailgard Gateway Plus customers have a centralised repository and management interface for business email and can avoid the annual cost and burden of third-party email hosting.
